

## Division Groups

1) Divide into groups of 8:

a) How many groups of 8 can you form?

b) How many items left over?

2) Divide into groups of 10:

a) How many groups of 10 can you form?

b) How many items left over?

3) Divide into groups of 3:

a) How many groups of 3 can you form?

b) How many items left over?

4) Divide into groups of 6:

a) How many groups of 6 can you form?

b) How many items left over?

5) Divide into groups of 5:

a) How many groups of 5 can you form?

b) How many items left over?

6) Divide into groups of 7:

a) How many groups of 7 can you form?

b) How many items left over?

7) Divide into groups of 2:

a) How many groups of 2 can you form?

b) How many items left over?

8) Divide into groups of 9:

a) How many groups of 9 can you form?

b) How many items left over?

### Answer key

1) Divide into groups of 8:

a) How many groups of 8 can you form?

3

b) How many items left over?

6

3) Divide into groups of 3:

a) How many groups of 3 can you form?

8

b) How many items left over?

1

5) Divide into groups of 5:

a) How many groups of 5 can you form?

4

b) How many items left over?

2

7) Divide into groups of 2:

a) How many groups of 2 can you form?

8

b) How many items left over?

1

2) Divide into groups of 10:

a) How many groups of 10 can you form?

2

b) How many items left over?

7

4) Divide into groups of 6:

a) How many groups of 6 can you form?

5

b) How many items left over?

1

6) Divide into groups of 7:

a) How many groups of 7 can you form?

2

b) How many items left over?

6

8) Divide into groups of 9:

a) How many groups of 9 can you form?

2

b) How many items left over?

5
